

SUMMARY

Software Engineer with 3 years of experience delivering **scalable, cloud-native applications** using **Java, Spring Boot, React, AWS, SQL, and Python**. Proven track record in **Microservice and REST APIs**, with strengths in **problem-solving, collaboration, and building secure, high-performing systems**.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript (ES6+), Python, TypeScript, HTML5, CSS3, SQL

Frameworks & Libraries: Spring Boot, React, Material-UI (MUI)

Databases: MySQL, Amazon RDS, SQL Server, DynamoDB

DevOps & Cloud Platforms: AWS (EC2, S3, RDS, Elastic Beanstalk, CloudWatch, Amplify, Lambda), Docker, Jenkins, Git

Tools & Platforms: IntelliJ IDEA, Eclipse, Maven, Kafka, Postman, Figma.

Analytics & Visualization: Data Modeling, Performance Monitoring, CloudWatch Dashboards, Grafana, Testing & QA Reporting

CERTIFICATIONS

[AWS Certified Solutions Architect – Associate](#)

Python for Everybody – Coursera (University of Michigan)

C for Everyone – Coursera (University of California)

Introduction to Python – Coding Ninjas

EDUCATION

Bachelor of Technology in Information Technology | MLR Institute of Technology | 2019 - 2023 | GPA: 8.7/10

Relevant Coursework: Object-Oriented Programming, Operating Systems, Web Development, Software Engineering, Database Systems, Artificial Intelligence, Big Data, Data Structures and Algorithms and Python Programming.

EXPERIENCE

Associate Software Engineer

KEKA HR | Aug 2023 – Current

- Built and deployed a 0-to-1 **US payroll product** using **Java, Spring Boot, React, TypeScript, AWS, and Microservices**, reducing development cycle time and ensuring modular deployments.
 - **Designed and implemented microservice communication patterns** using REST and asynchronous messaging (Kafka), enabling independent scaling and fault isolation across payroll, benefits, and compliance modules.
 - Developed pixel-perfect, **responsive frontend screens** with **React and Material-UI**, delivering an enterprise-grade user experience aligned with **UI/UX best practices**.
 - **Optimised SQL queries and database schemas**, boosting application scalability and reducing query response time by 30%.
 - Deployed backend services with **Docker, Jenkins, AWS EC2, and RDS**, increasing deployment velocity and infrastructure resilience by 25%. And, also **implemented secure REST APIs** with authentication and validation for payroll workflows.
 - Applied domain expertise in **US and Indian payroll regulations** to build compliant modules; acted as Subject Matter Expert in **QA**, identified edge cases, and ensured compliance through **testing (JUnit)** and **code reviews** that improved **data quality and reliability**.
-

Software Engineer Intern

KEKA HR | Jan 2023 – Jul 2023

- **Developed frontend modules** in **React, TypeScript, and HTML/CSS**, improving responsiveness and user experience for internal dashboards.
- **Supported backend services** in **Java, Spring Boot, and SQL**, contributing to API enhancements and reducing error rates by 10%.
- **Assisted in API integration**, connecting frontend UI to **secure REST APIs** for seamless data flow across business systems.
- **Participated in Agile sprints**, collaborating with **QA, PMs, and developers** to ensure on-time delivery of feature releases.

- **Debugged and tested modules**, applying **attention to detail** to maintain accuracy and quality of delivered software.
 - **Maintained documentation** of technical specifications, improving team knowledge transfer and onboarding efficiency.
-

PROJECTS

Food Delivery App

Java, Spring Boot, React, AWS | 2024

- Designed and developed a full-stack **Food Delivery App** with **React** frontend, **Spring Boot (Java)** backend, and **MySQL, MongoDB**, enabling user creation, user login, restaurant listing, food item listing and order management.
- **Deployed on AWS (EC2, S3)** with **CloudWatch performance monitoring** and automated builds via **CI/CD scripts**, ensuring scalability, reliability, and maintainable cloud operations.

Lead Management System

Java, Spring Boot, React, AWS | 2023

- Designed and developed a full-stack **Lead Management System** with **React** frontend, **Spring Boot (Java)** backend, and **MySQL**, enabling lead creation, assignment, tracking, and status updates with real-time UI synchronization for efficient sales workflows.
- **Deployed on AWS (EC2, S3)** with **CloudWatch performance monitoring** and automated builds via **CI/CD scripts**, ensuring scalability, reliability, and maintainable cloud operations.

Authentication by Negative Encrypted Password

Java, SQL, AWS | 2023

- **Built a secure authentication system** using **ENP with SHA-256 hashing and AES encryption**, contributing backend logic in **Java** and credential storage design for scalability and minimal integration overhead.
- **Documented workflow and security analysis**, demonstrating resistance to brute-force and precomputation attacks while aligning with **security best practices**.

Tourism Website (ADVENTOUR)

Java, SQL, AWS Amplify | 2022

- **Engineered a responsive tourism platform** showcasing local destinations with bookings, transport suggestions, chatbot integration, and optimized **SQL database connections** to improve user experience.
 - **Applied modular architecture principles** and deployed on **AWS Amplify with CI/CD pipelines**, improving performance, maintainability, and scalability.
-
